

## Cloud Services Administration

**Duration: 1 Day**

### What you will learn

This Cloud Services Administration training teaches you how to activate and manage Oracle Cloud services using My Account and My Services applications. Whether you take this course in person, in the classroom, or online, you'll walk away with a deeper understanding of how this solution can greatly benefit your business.

### Learn How To:

- Use My Account to activate your Oracle Cloud orders
- Create other identity domain administrators or account administrators
- Monitor service usage across identity domains and data centers
- Use My Services to perform advanced administrative functions
- Create users, assign roles and manage passwords
- Customize dashboards and create service instances
- Configure alert rules to monitor metrics
- Export metric data for a specific identity domain
- Activate different types of services
- Perform other monitoring functions related to the services they activate

### Benefits to You

By taking this lecture-only seminar, you'll empower yourself as a Cloud administrator with enough Oracle Cloud administration knowledge to activate, manage, and monitor Oracle Cloud services and users in your company.

### Audience

Cloud Administrator

### Course Objectives

- Use My Services to create alert rules to monitor resource usage for the Integration Cloud service.
- Download metrics report for an instance of the Integration Cloud service.
- Lock the Database service.
- As a service administrator, log in to My Services to view and monitor service details and create instances for your entitlement for your domain.
- Associate related services.
- Use My Services to enable single sign-on.

**EZY Intellect Pte. Ltd.,**
